This newly designed belt oscillation system is combined with the main motor and gear system. The machine is equipped with a small table for curved corner sanding and two large cast aluminum tables for versatile vertical oscillation edge sanding. This series utilizes a powerful drive motor for efficient mass production requirements. All tables are equipped with tilting and height adjustment devices.

Belt change and belt oscillation adjustment are fast and easy.

Designed and built for long-term operation, and superior surface sanding results.

Two drums are rubber coated and equipped with balance adjustment fixtures.
